

AMENDMENTS TO THE CLAIMS

Please amend the claims as follows:

1-69. (Canceled)

70. (Currently amended) The mounting assembly of claim [[65]] 107, wherein the mounting member is a magnet secured to a second end portion of the spring such that the spring is substantially perpendicular with respect to the magnet.

71. (Currently amended) The mounting assembly of claim [[65]] 107, wherein the mounting member is a button shroud secured to a second end portion of the spring.

72. (Currently amended) The mounting assembly of claim [[65]] 107, wherein the mounting member is a snap assembly secured to a second end portion of the spring.

73. (Currently amended) The mounting assembly of claim [[65]] 107, wherein the mounting member is a suction cup assembly secured to a second end portion of the spring.

74-82. (Canceled)

83. (Previously presented) A kit for creating wobble objects comprising:
 paper for printing a desired image; and
 a mounting assembly to secure to a back side of the image, wherein the mounting assembly includes:
 at least one first mounting plate;
 at least one second mounting plate;

and at least one spring secured to the first mounting plate and the second mounting plate such that the at least one spring extends between the first and second mounting plates in a substantially perpendicular manner;

wherein the first mounting plate and the second mounting plate each includes an adhesive layer provided on a first side of the plate, and

wherein each of the first mounting plate and the second mounting plate includes a removable film layer provided over the adhesive layer.

84. (Previously presented) The kit of claim 83, further comprising at least one of a body or background for securing the mounting assembly and image thereto.

85. (Previously presented) The kit of claim 84, further comprising a base for supporting the body or background.

86. (Previously presented) The kit of claim 83, further comprising cardstock to create greeting cards.

87. (Previously presented) The kit of claim 83, further comprising one or more magnets.

88. (Previously presented) The kit of claim 83, further comprising one or more easel backs.

89. (Previously presented) The kit of claim 83, further comprising preprinted images for securing the mounting assembly and image thereto.

90. (Previously presented) The kit of claim 83, further comprising at least one book for securing the mounting assembly and image thereto.

91. (Previously presented) The kit of claim 83, wherein the spring is a compression spring with substantially flat ends.

92. (Previously presented) The kit of claim 83, wherein the spring has a compressed height of 0.099 in. or less.

93. (Canceled)

94. (Currently amended) A greeting card comprising:

a base having a recessed area;

~~The greeting card of claim 93, further comprising~~ a greeting card panel coupled to the base, wherein the greeting card panel is adapted to fold over the base in a book-like manner;

a substantially flat image provided within the recessed area; and

a mounting assembly coupled between the base and the image, the mounting assembly comprising:

a first mounting plate;

a spring having a first end portion secured to the first mounting plate such that the spring is substantially perpendicular with respect to the first mounting plate,

wherein the substantially flat image is secured to the first mounting plate,

wherein the spring facilitates a wobble movement of the mounting plate and the image in a clockwise and counterclockwise manner with respect to the longitudinal axis of the spring.

95. (Previously presented) The greeting card of claim 94, further comprising hook and loop fasteners to hold the greeting card together in a closed manner.

96. (Previously presented) The greeting card of claim 95, wherein the greeting card is a self-mailer greeting card and a mailing address can be provided on an outside portion of the greeting card.

97. (Currently amended) The greeting card of claim ~~[[93]]~~ 94, wherein the mounting assembly includes a spring mounted substantially perpendicularly between the base and the substantially flat image.

98. (Previously presented) The greeting card of claim 97, wherein the spring has a compressed height of 0.099 in. or less.

99. (Currently amended) The greeting card of claim ~~[[93]]~~ 94, further comprising at least one microchip or battery to provide at least one of a recorded message, music, and voice activation.

100-106. (Canceled)

107. (Previously presented) A mounting assembly for an image comprising:
a first mounting plate;
a mounting member;
a spring secured between the first mounting plate and the mounting member,
wherein the spring has a first end portion secured to the first mounting plate such that the spring is substantially perpendicular with respect to the first mounting plate,
wherein the spring has a second end portion secured to the mounting member such that the spring is substantially perpendicular with respect to the mounting member;
and

wherein the spring facilitates a wobble movement of the mounting plate in a clockwise and counterclockwise manner with respect to the longitudinal axis of the spring
wherein the first mounting plate includes an adhesive layer thereon and a removable film layer provided over the adhesive layer.

108. (Currently amended) The mounting assembly of claim [[65]] 107, wherein the mounting member is a hook and loop fastener secured to a second end portion of the spring.

109. (Previously presented) The mounting assembly of claim 107, wherein the mounting member is a second mounting plate having an adhesive layer thereon and a removable film layer provided over the adhesive layer.

110-112. (Canceled)

113. (Previously presented) The mounting assembly of claim 107, further comprising a second mounting plate secured to a second end portion of the spring such that the spring is substantially perpendicular with respect to the second mounting plate.

114. (Previously presented) The mounting assembly of claim 107, further comprising a spring mount employed to secure the spring to the first mounting plate.

115. (Previously presented) The mounting assembly of claim 114, wherein the spring mount comprises epoxy resin.

116. (Previously presented) The mounting assembly of claim 107, wherein the spring has a compressed height of 0.099 in. or less.

117. (Previously presented) The mounting assembly of claim 107, further comprising a microchip to provide at least one of audio or visual output secured to a second end portion of the spring.
